

# BUYER'S GUIDE

## REVERSIBLE WINDOW COMING SOON FROM LINIAR

Leading PVCu systems house Liniar is set to extend its innovative range even further with the introduction of a reversible window, which will offer a convenient, stylish and safe option for difficult-to-access locations.

Ideal for high-rise projects, the moving pane rotates through a full 180° cycle, allowing the external glass of a Liniar reversible window to be safely cleaned from the inside of the property. The rotating mechanism keeps the moving pane from intruding into the inside of the room – so no snagging on curtains or blinds.

## SARNAFIL ROOF INSTALLED ON GRADE 2 LISTED MANSION

Roof Assured by Sarnafil installer, ROOFPRO London Ltd, was appointed for this interesting project in Holland Park by main contractor IMKO London Ltd.

With huge mansions and a relaxed feel, Holland Park is one of the most exclusive areas of London. ROOFPRO installed the Sarnafil single ply membrane on a Grade 2 listed building converted into flats and owned by a charitable institute.

The original 320 m2 roof was made up of layers of felt and asphalt roofing materials and in a very poor condition.
